

شركة تقنية ليبيا للأعمال الهندسية  
Taknia Libya Engineering Company

## Environmental Policy Statement

Taknia Libya Engineering Company (Company) recognizes its moral and legal obligations and is committed to sound Environmental practices to conduct its business in a manner which protects and preserves the environment by all who are associated and involved with its activities.

Company's commitment will be in conformity and compliance with all applicable national and international laws and regulations and aligned to corporate QHSE policies. The Company utmost importance is to provide a minimal impact to the environment wherever possible to ensure avoidance of any negative effect/impact on the Environment.

The Company also, is committed to understand customer's and stakeholder's expectations and managing the business processes to achieve high quality of Services and Products in compliance with relevant laws, legislation and other relevant standards utilising the following principles and commitments:

- Employ and implement an Environment Management System (EMS) as part of its integration of fundamental QHSE aspects into Corporate Integrated Management System (CIMS). This system will be aligned to / comply with ISO 14001 International Requirements and Continuous Improvement
- Ensure the necessary resources will be provided to support the implementation of this Policy at all levels using defined and implemented objectives and targets that are reviewed and updated annually on the basis of ISO 14001 Requirements;
- To control/minimise the impact on the environment by ensuring that all activities carried out in the business process is established to environmental standards and procedures.
- All employees to work in as environmentally friendly manner and cooperate with Company management to negate the impacts and effects at all work sites and places.
- Promote the Environmental culture and no individual will be expected or forced to work in an unsafe working environment where an unsafe condition is known.
- Training and continuous development and enhancement of the company's employees soft-skills.
- Conduct regular audits and periodic Management Reviews to monitor and assess EMS performance,
- Promotes teamwork approach in conducting activities to reduce effort and time in providing services and products that meets and or exceeds customers' expectations
- Ensure all personnel are aware of their responsibilities and are properly trained to undertake them diligently,

The overall responsibility for compliance with the EMS principles lay within the Management. The respect and implementation of these principles are delegated to all employees and others working on behalf of Taknia whether on company premises or carrying out company business elsewhere. In addition, the company recognizes its responsibilities for clients or partners whilst working on Taknia premises.

Any amendments to this policy resulting from its annual reviews, is to be widespread and well introduced to all employees and available, on request, to others and the general public.
